COMPANY INTRODUCTION

After 16 years working in the PP woven industry, our founder realized that there has been a gap between FIBC manufacturers and customers both inside and outside the country. Therefore, EPP Vietnam Co., Ltd was established in February, 2016 with an important mission become an international B2B supplier which experts in distribution and production FIBC Bags, promoting Vietnamese brands to the global market.

Now, we're proud of being sales representatives of FIBC manufacturers in Vietnam. Our products are FIBCs: Type A,B,C, sling big bags, UN big bags, baffle big bags, ventilated big bags,... according to ISO standards with a total capacity of 30 millions products per year. This is the solid foundation for our commitment to meet all the customer requirements related to quality, quantity, price and service in the best way.

EPP Vietnam commits to bring customers products with Stable quality, Competitive price and Professional service.

COMPANY STRUCTURE

Mr. Job Phi - CEO

Mrs. Sarah
Financial manager

Ms. Charlie
Sales Manager

Mr. Daniel
Purchasing manager

Mr. David
Sales executive

Ms. Ellie
Sales executive

Ms. Mia
Sales executive

Ms. Hana
Marketing specialist

Purchasing executive

BUSINESS STRATEGY

VISION

Become an international B2B supplier which experts in distribution and production. We help manufacturers connect to customers faster.

MISSION

Provide FIBC products (Type A,B,C), UN big bags, baffle big bags, food-grade big bags, ventilated big bags,...

OUR CORE VALUES

QUALITY

Thanks to experienced quality control team and modern testing equipments, we commit to provide customers with our “**Stable quality**” products.

PRICE

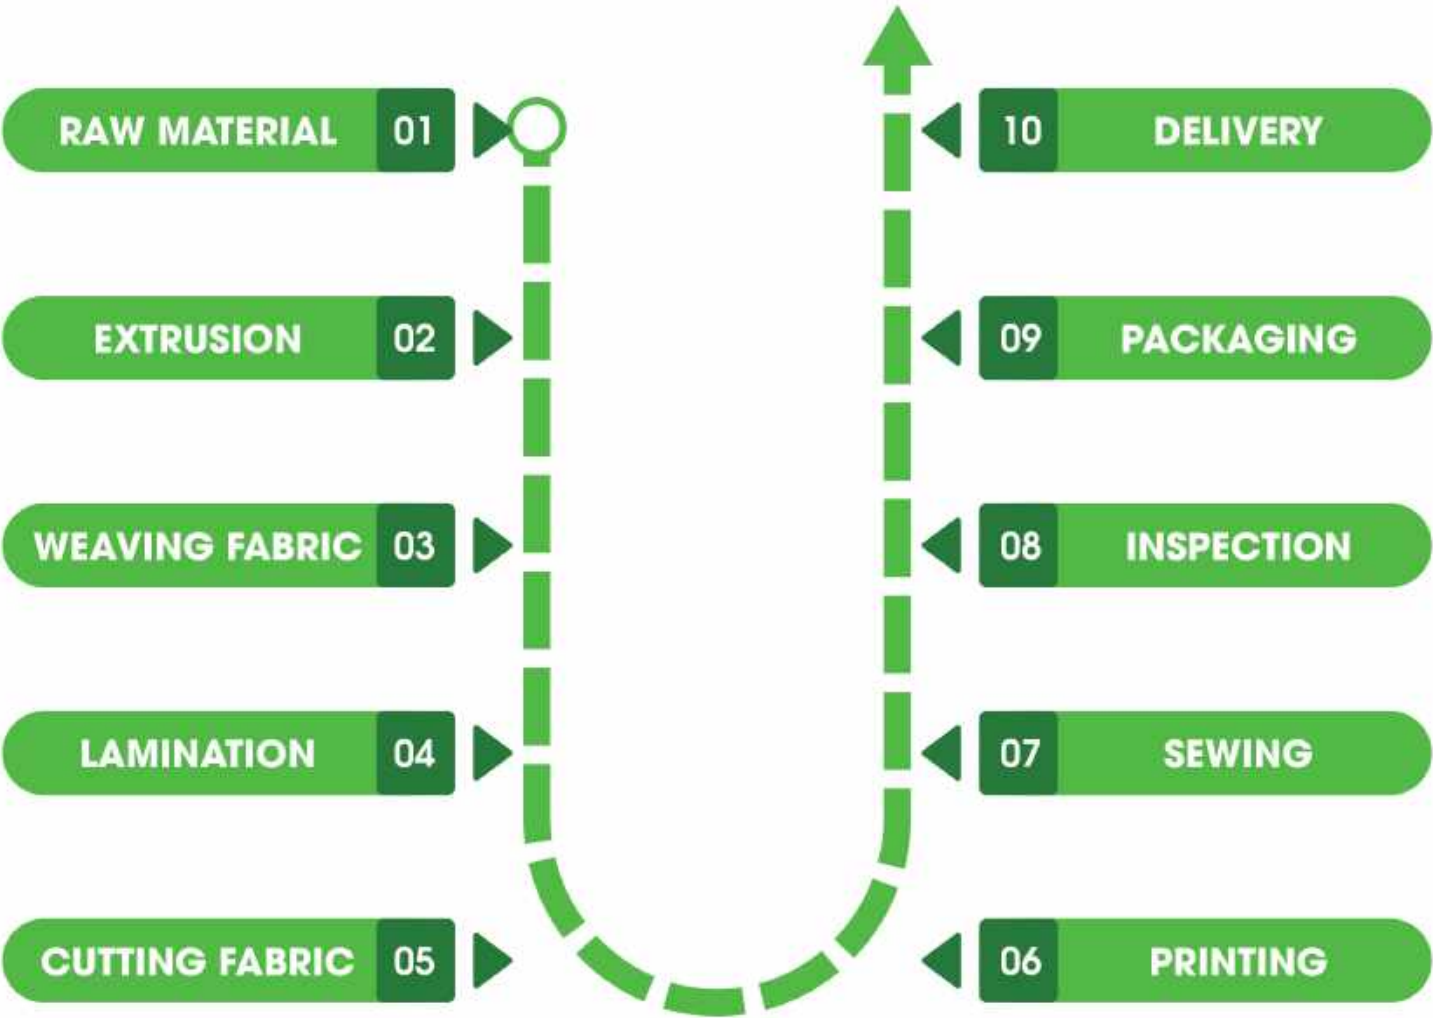

Thanks to profesional purchasing department, we manage all the cost of product from input material, labor and other fixed costs. Therefore, we guarantee to supply products with stable quality with “**Competitive price**”.

SERVICE

With professional and experienced sales teams, we commit to bring customers “**Professional Services**” such as: quick quotation, website-reference price, design consultancy, flexible delivery and method of payment...

PRODUCTION LINE

01 RAW MATERIAL

Main materials are PP resin, HDPE resin, Pigment masterbatch, UV resistant resin,... imported according to product specifications.

02 EXTRUSION

Modern extruder machines which are imported from reliable brands such as Straliger, Lohia, Hana, Hengli, and Yang Ming, help to create best yarns with high denier, traction and color according to standard.

03

WEAVING FABRIC and LOOPS

High-speed circular loom machines which are imported from reliable brands such as Starlinger, Lohia, Hana, hengli, Yong Ming... can produce woven fabric rolls with high density, fabric surface is tight and stable

Weaving loops machine can create loops from 20mm to 110mm width as well as high strength and good loading.

04

LAMINATION

High-speed lamination machines are imported directly from Taiwan, China and India... Lamination density between 15-30gram per square ensures the adhesion and waterproof abilities.

05 CUTTING FABRIC

Automatic high-speed cutting machine systems which are imported from Taiwan, China, India... can make semi - finished products with various dimesions and high accuracy, according to customers' request

06 PRINTING

Flexo printing machine 3-5 colours which are imported from Taiwan, China, India... can print images on fabric well, clearly, and precisely.

07 SEWING

Modern sewing machine system can meet all technological requirements for FIBC bags such as single needle sewing, over-lock sewing,...

08 INSPECTION

With an experienced QC team and testing machine system from extrusions, weaving, cutting, industrial cleaning, inspecting the load and packaging process... customers are committed to receive stable-quality products.

09 PACKAGING

Baling press machines which have various pressures, are able to meet all the customers demands from small packages, big packages or pallets.

10 DELIVERY

With professional and international shipping services, we commit to deliver the products to customers safely, flexibly and on schedule.

MACHINERY

Yarn extrusion machine, capacity
320-650 kg/h

Circular loom machine, 900mm –
2500 mm width

Weaving loops machine

Lamination machine (1 side), capacity
80-150 meter per minute

5

Automatic Cutting Machine,
30 – 40 pieces/minute

6

Industrial Sewing Machine

7

Automatic Cutting Machine,
30 – 40 pieces/minute

8

Baling Press Machine

9
UV testing machine

10
Stacking test machine

11
Tensile testing machine

12
Lift testing machine
